Full stack JavaScript developer with a degree in graphic design. Working for a London-based prop-tech startup. Currently looking for freelance/full-time opportunities.

Technology

Primarily a JavaScript developer, working in Angular/React with Node.js and MongoDB. Experience with Ruby, Rails 5 API and PostgreSQL.

Design

Proficient with Adobe Indesign, Illustrator and Photoshop. Experience with Sketch and Webflow.

Experience

Pad | November 2017 - Present

Full Stack Developer

I began working at Pad, a prop-tech startup, part-time whilst still teaching at General Assembly. I started working for them full-time in March 2018. Working with Angular and Node.js, I built a web-based platform for landlords to upload and manage their properties, which could then be displayed to tenants to rent, deposit-free, via a mobile app.

General Assembly | September 2016 - March 2018

Instructor

I re-joined the General Assembly team as a co-instructor, and later as a lead instructor, after realising that I wasn't quite ready to leave such a rewarding and exciting organization. As an instructor, my role was to lead the class in lessons and codealongs, as well as write and update sections of the Web Development Immersive curriculum. The curriculum included React, Angular and Node.js, as well as the fundamentals of HTML, CSS and JavaScript.

Keepthinking | January 2016 - September 2016

Front End Developer

Keepthinking is a design and web development agency that also offers custom collection management software. Working closely alongside the design team, my role involved taking functional design specifications and building the front end of sites from scratch, integrating them with the back end and ensuring that all bugs are addressed throughout the testing process, as well as helping to maintain the live sites of over 30 clients.

General Assembly | September - December 2015

Teaching Assistant

Following my graduation at General Assembly I was chosen to become part of the instructional team on the Web Development Immersive course in London. Having enjoyed the learning experience so much, this was a fantastic way to cement my knowledge, and pass on my experience to new students. As well as assisting students in class and assessing homework submissions, the role also involved running labs, code-alongs and reviews.

Education

General Assembly

2015

Web Development Immersive

University of Portsmouth

2010 – 2013

BA (Hons) Graphic Design

First Class Honours

Buckinghamshire New University

2009 –2010
